NYLON DEFLASHING / BLASTING MEDIA 0.20MM AND 0.30MM

Thanks to newly developed technologies Emsodur has succeeded in manufacturing ultra fine and dimensionally exact deflashing media. This nylon deflashing media is of cylindrical shape and is offered in the sizes of 0.20mm and 0.30mm. This Polyamide based deflashing media is especially suited for deflashing, blasting and surface treatment of small and delicate parts. These parts can be made of thermoset, thermoplastics or metal. In order to guarantee a free flowing process in the blasting machine the product has been treated with an anti-static solution. These products are available in different types of packaging.

Wide range of Nylon deflashing media

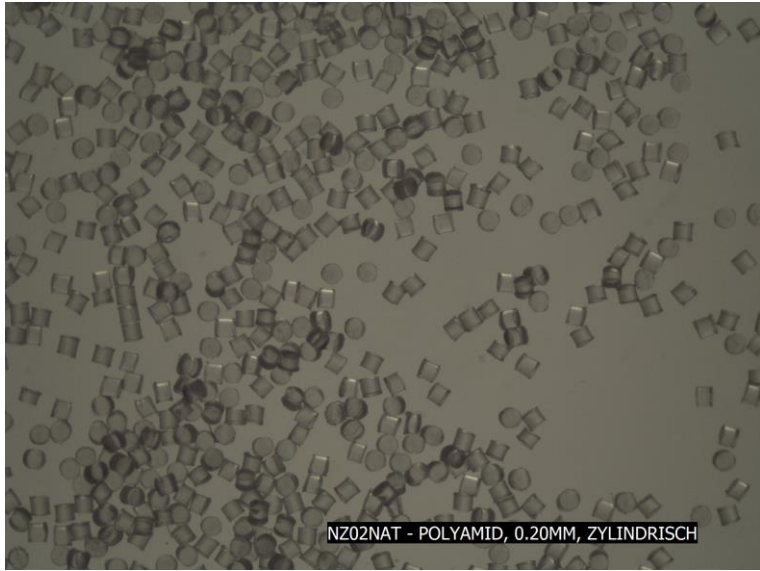

With the introduction of these new, ultra fine nylon based deflashing / blasting medias, Emsodur can offer a standard product range from 0.20mm – 2.00mm. From the size 0.50mm and upwards all sizes are available in both cubed and cylindrical shape.

Size (mm)	Shape	Colour
0.20	Cylindrical	Natural
0.30	Cylindrical	Natural
0.40	Cylindrical	Natural, red
0.50	Cubic / cylindrical	Natural, red
0.75	Cubic / cylindrical	Natural, red
1.00	Cubic / cylindrical	Natural, red
1.20	Cubic / cylindrical	Natural, red
1.50	Cubic / cylindrical	Natural, red
2.00	Cubic / cylindrical	Natural, red

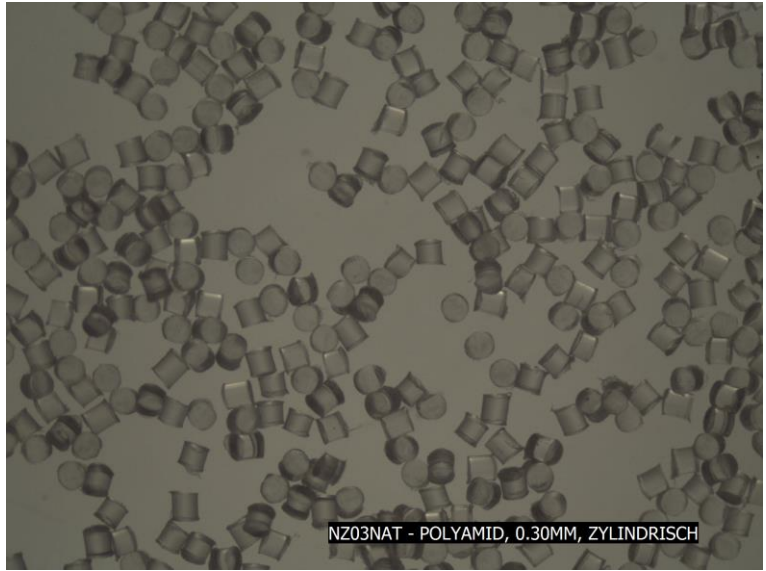

We are very flexible in regard of customer needs and can vary in sizes and colours.

Please contact us for further information and quotation.
